

# System Integration

The evolution of software technology and the complexity of IT landscapes lead to an increasing demand for IT consulting and systems integration support. Government guidelines require organizations to integrate their IT into larger and more advanced systems. Inundated with a consistent flow of data, using continuously advancing technologies to address changing customer expectations, agencies are under demands to also reduce costs and make integration projects more efficient and effective. Difficult decisions are made every day, prioritizing projects and realigning and readjusting IT capabilities to meet less-certain business requirements. As a result, it is essential to have the capability to deliver a reliable technology integration approach across a wide range of projects. Fast-track migration of applications into production or consolidation can be a strategic advantage or a drag on performance. Balancing speed and risk is critical.

## *What is Systems Integration?*

Systems Integration is bringing together multiple technologies into one effective system designed to meet an organizational need.

System Integration is also the process of connecting systems, devices, and programs together in a common architecture so as to share and exchange data.

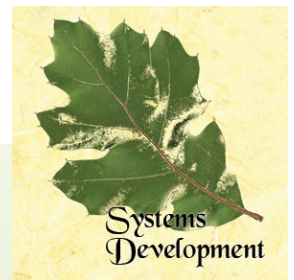

## *What are the Benefits?*

The integration of different systems optimizes your business processes and helps create higher value by:

- Providing the ability to access real-time data and gain a consolidated view of your organization
- Reducing cycle times and costs
- Providing higher performance
- Increasing your flexibility

## *What can COE Offer?*

The Center for Organizational Excellence, Inc., (COE) system integration approach provides a seamless migration between enterprise systems and optimizes integration efficiency. COE's extensive knowledge of technology offers you expert advice at any time and ensures implementation of best-in-class solutions. With COE's innovative solutions, used correctly, you are securing the future of your organization.
